## OUR SERVICES

Sumo is a trusted construction services and building materials provider, proudly serving clients since 2017. With a strong commitment to quality, safety, and professionalism, we deliver reliable solutions for both residential and commercial projects.

Our core services include concrete coring, demolition works, waterproofing, painting, and masonry works. Backed by skilled professionals and modern equipment, we ensure every project is executed with precision, efficiency, and attention to detail.

In addition to our construction services, Sumo is a dependable supplier of high-quality building materials and fittings. Our product range includes concealed water closets, heavy-duty floor and roof drains, GRPC tanks, and other essential construction components designed to meet industry standards.

At Sumo, we combine technical expertise with durable products to support long-lasting structures. Our goal is to provide complete construction solutions that meet our clients' needs while exceeding expectations.

- Demolition Works
- Waterproofing Solutions
- Painting Services
- Masonry Works

## Building Materials & Products Supply

- Concealed Water
- Closets Heavy-Duty Floor Drains
- Heavy-Duty Roof Drains
- GRPC Tanks
- Other Specialized Building Materials

## Concrete Coring Services

Concrete coring is a precise drilling process used to create clean, accurate circular openings in concrete, reinforced concrete, asphalt, and masonry surfaces. This method is ideal for installing plumbing pipes, electrical conduits, HVAC systems, anchor bolts, and utility lines without causing structural damage.

Our concrete coring services use advanced diamond drilling equipment to ensure smooth, vibration-free cuts with minimal noise and dust. We deliver exact hole sizes and depths while maintaining the integrity of surrounding structures. Suitable for residential, commercial, and industrial projects, concrete coring provides a safe, efficient, and professional solution for all drilling requirements.

## Demolition Works

Demolition works involve the safe and systematic dismantling or removal of buildings, structures, and concrete elements to prepare sites for renovation, reconstruction, or new developments. This includes partial or full demolition of residential, commercial, and industrial structures while ensuring minimal impact on surrounding properties.

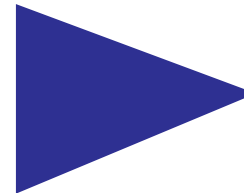

Our demolition services are carried out using modern equipment and proven techniques, with strict adherence to safety regulations and environmental standards. We handle site assessments, controlled demolition, debris removal, and proper waste disposal to deliver efficient, clean, and timely results. From small-scale interior demolitions to large structural projects, we provide reliable solutions tailored to project requirements.

## Waterproofing Solutions

Our waterproofing solutions are designed to protect structures from water penetration, moisture damage, and long-term deterioration. We provide effective waterproofing for roofs, basements, foundations, bathrooms, balconies, water tanks, and other critical areas of buildings.

Using high-quality materials and proven application techniques, we ensure durable protection against leaks, dampness, and structural weakening. Our team carefully assesses each site to deliver reliable, long-lasting waterproofing solutions that enhance building safety, comfort, and lifespan.

## Painting Services

We provide professional painting services for residential, commercial, and industrial projects. Our work includes interior and exterior painting, surface preparation, and finishing, ensuring smooth, durable, and high-quality results.

Using premium paints and modern application techniques, we deliver finishes that enhance appearance while providing long-lasting protection against weather and wear. Our skilled team pays close attention to detail, cleanliness, and timely delivery on every project.

## Masonry Works

We deliver high-quality masonry works for residential, commercial, and industrial construction projects. Our services include block work, brickwork, stonework, plastering, and general structural finishing, executed with precision and durability in mind.

With skilled craftsmen and quality materials, we ensure strong, neat, and long-lasting masonry that meets design specifications and structural standards. Our focus is on accuracy, strength, and clean finishes that form the foundation of reliable construction.

## Concealed Water Closets

We supply high-quality concealed water closets designed to deliver a modern, clean, and space-saving bathroom finish. These systems feature concealed cisterns installed within walls, providing a sleek appearance while maintaining efficient flushing performance.

Our concealed water closets are built for durability, water efficiency, and ease of maintenance, making them ideal for residential, commercial, and hospitality projects. They combine functionality with contemporary design, enhancing both comfort and aesthetics in modern sanitary installations.
